NEW QUESTION: 2

HOTSPOT

An organization deploys System Center Configuration Manager (ConfigMgr). The organization is performing an inventory of physical servers that run Linux.

Inventory reports must include details on hardware and software. The ConfigMgr instance collects software information for all servers but does not collect hardware information. You need to ensure that ConfigMgr collects hardware information.

From the Administration tab of the ConfigMgr console, what should you configure? To answer, select the appropriate option in the answer area.

Answer area

Answer:

Explanation:

NEW QUESTION: 3

R1 is configured with the default configuration of OSPF. From the following list of IP addresses configured on R1, which address will the OSPF process select as the router ID?

A. 172.16.2.225

B. 192.168.0.1

C. 172.16.2.1

D. 172.16.1.1

Answer: B

Explanation:

The Router ID (RID) is an IP address used to identify the router and is chosen using the following sequence.

+

The highest IP address assigned to a loopback (logical) interface. + If a loopback interface is not defined, the

highest IP address of all active router's physical interfaces will be chosen.

+

The router ID can be manually assigned In this case, because a loopback interface is not configured so the highest active IP address 192.168.0.1 is chosen as the router ID.

NEW QUESTION: 4

Review the following scenario: You are teaching a Check Point Course, and you pose the following question:

"Explain the path you are going to take in the next six months to implement network security and the factors that will lead you in that direction" Which question type does this question BEST represent?

- A. Stir
- B. Closed
- C. Smorgasbord
- D. Probe

Answer: D
