(In case you do not receive any message, please notice us at your available **Dumps 512-50 Discount** time, do not forget to check junk mailbox.) Dear examinees, firstly we feel heartfelt to meet you, and welcome to browse our website and products.

Each staff can give you the professional introductory and details about 512-50 training online questions with the most satisfactory attitude, There is a lot of exam software on the market; why our 512-50 test bootcamp comes out top?

So you will enjoy the best learning experience every once in a while, Candidates who get failed, even after struggling hard to pass the exams by using our 512-50 latest dumps, are advise to claim our money back guarantee.

#### **NEW QUESTION: 1**

An organization is planning to replace its wired networks with wireless networks. Which of the following would BEST secure the wireless network from unauthorized access?

- A. Implement Wi-Fi Protected Access (WPA) 2
- B. Disable open broadcast of service set identifiers (SSID)
- C. Permit access to only authorized Media Access Control (MAC) addresses
- D. Implement Wired Equivalent Privacy (WEP)

**Answer: A**

Explanation:

Wi-Fi Protected Access (WPA) 2 implements most of the requirements of the IEEE 802.11i standard. The Advanced Encryption Standard (AES) used in WPA2 provides better security. Also, WPA2 supports both the Extensible Authentication Protocol and the preshared secret key authentication model. Implementing Wired Equivalent Privacy (WEP) is incorrect since it can be cracked within minutes. WEP uses a static key which has to be communicated to all authorized users, thus management is difficult. Also, there is a greater vulnerability if the static key is not changed at regular intervals. The practice of allowing access based on Media Access Control (MAC) is not a solution since MAC addresses can be spoofed by attackers to gain access to the network. Disabling open broadcast of service set identifiers (SSID) is not the correct answer as they cannot handle access control.

**NEW QUESTION: 2**

The PRIMARY objective of security awareness is to:

- A. ensure legal and regulatory compliance
- B. ensure that security policies are understood.
- C. notify of actions for noncompliance.
- D. influence employee behavior.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

It is most important that security-conscious behavior be encouraged among employees through training that influences expected responses to security incidents. Ensuring that policies are read and understood, giving employees fair warning of potential disciplinary action, or meeting legal and regulatory requirements is important but secondary.

**NEW QUESTION: 3**

Which front panel LEDs on an Integrity rx2620 can indicate an error?

- A. System LED and Diagnostic LEDs
- B. Power LED and Diagnostic LEDs
- C. Diagnostic LEDs and Locator LED
- D. Locator LED and System LED

**Answer: A**
