They are all patient and enthusiastic to offer help on Service-Cloud-Consultant study guide, 4: For our regular Service-Cloud-Consultant customer we will give discount if you

want to buy other study guide.

NEW QUESTION: 1

A customer needs corporate IT governance and cost oversight of all AWS resources consumed by its divisions. The divisions want to maintain administrative control of the discrete AWS resources they consume and keep those resources separate from the resources of other divisions. Which of the following options, when used together will support the autonomy/control of divisions while enabling corporate IT to maintain governance and cost oversight?

Choose 2 answers

- A.** Enable IAM cross-account access for all corporate IT administrators in each child account.
- B.** Use AWS Consolidated Billing and disable AWS root account access for the child accounts.
- C.** Write all child AWS CloudTrail and Amazon CloudWatch logs to each child account's Amazon S3 'Log' bucket.
- D.** Create separate VPCs for each division within the corporate IT AWS account.
- E.** Use AWS Consolidated Billing to link the divisions' accounts to a parent corporate account.

Answer: C,E

NEW QUESTION: 2

Which is the correct formula for calculating the file system backup bandwidth?

- A.** If replication is not required, the formula is as follows:
Required bandwidth (with client deduplication) = Data amount of full backup --- Backup window -f Bandwidth utilization rate.
- B.** If replication is not required, the formula is as follows:
Required bandwidth (with deduplication at the media end) = Data amount of full backup -r Deduplication ratio -r Backup window -f Bandwidth utilization rate.
- C.** If replication is not required, the formula is as follows:
Required bandwidth (without deduplication) = Data amount of full backup -f Backup window -r Bandwidth utilization rate.
- D.** If replication is required, the formula is as follows:
Required bandwidth (with deduplication) = Amount of data to be replicated -r Backup window -r Bandwidth utilization rate.

Answer: C

NEW QUESTION: 3

- A.** Option E
- B.** Option A
- C.** Option D
- D.** Option B
- E.** Option C

Answer: A,D,E

Explanation:

B: For an Oracle RAC CDB, one active undo tablespace exists for each instance.

C: From a physical perspective, a CDB has basically the same structure as a non-CDB, except that each PDB has its own set of tablespaces (including its own SYSTEM and SYSAUX tablespaces) and data files.

NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Your company has an Office 365 subscription.

Users at the company use Microsoft Skype for Business to send instant messages to internal users, external partners, and users on the consumer version of Skype.

You discover that the Skype for Business users fail to communicate with users on Google Hangout.

You need to ensure that the Skype for Business users can send instant messages to the Google Hangout users.

Solution: You run the Set-CSExternalAccessPolicy-identity FederationAndPICDefault-EnablePublicCloudAccess \$true command. Does this meet the goal?

A. No

B. Yes

Answer: B

Explanation:

Explanation

The net result: all external access policies that allow public cloud access will also allow federation access.

The EnablePublicCloudAccess parameter indicates whether the user is allowed to communicate with people who have SIP accounts with a public Internet connectivity provider such as MSN. The default value is False.
