NEW QUESTION: 1

What is the MOST important element to include when developing user security awareness material?

- A. Detailed security policies
- B. Senior management endorsement
- C. Easy-to-read and compelling information
- D. Information regarding social engineering

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Making security awareness material easy and compelling to read is the most important success factor.

Users must be able to understand, in easy terms, complex security concepts in a way that makes compliance more accessible. Choice A would also be important but it needs to be presented in an adequate format. Detailed security policies might not necessarily be included in the training materials. Senior management endorsement is important for the security program as a whole and not necessarily for the awareness training material.

NEW QUESTION: 4

Your network contains an Active Directory domain named adatum.com.

The domain contains a domain controller named DC1 that runs Windows Server 2012 R2.

On Dc1, you open DNS Manager as shown in the exhibit. (Click the Exhibit button.)

You need to change the zone type of the contoso.com zone from an Active Directory-integrated zone to a standard primary zone. What should you do before you change the zone type?

- A. Unsign the zone.
- B. Modify the Zone Signing Key (ZSK).
- C. Change the Key Master.
- D. Modify the Key Signing Key (KSK).

Answer: A

Explanation:

A. Lock icon indicating that it is currently signed with DNSSEC, zone must be unsigned

B. An authentication key that corresponds to a private key used to sign a zone.

C. The KSK is an authentication key that corresponds to a private key used to sign one or more other signing keys for a given zone.

Typically, the private key corresponding to a KSK will sign a ZSK, which in turn has a

corresponding private key that will sign other zone data.
