All users can implement fast purchase and use our learning materials.

NEW QUESTION: 1

Which of the following is not considered a factor that increases the bargaining power of the customer?

- A. Much information is available to the customer to compare and contrast features of all products on the market.
- B. One group of customers makes up a large volume of the firm's business.
- C. Buyers have low switching costs of changing products.
- D. The firm is unable to change suppliers easily.

Answer: D

Explanation:

Choice "d" is correct. When a firm is unable to change suppliers easily, that is a factor that increases the bargaining power of the suppliers.

Choices "a", "b", and "c" are incorrect because they all are factors that increase the bargaining power of the customer, which are:

- . Customers make up a large volume of a firm's business.
- . There is much information available to customers.
- . The buyers have low switching costs.
- . There are a high number of alternate suppliers.

NEW QUESTION: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription named Subscription1.

Subscription1 contains a resource group named RG1. RG1 contains resources that were deployed by using templates.

You need to view the date and time when the resources were created in RG1.

Solution: From the Subscriptions blade, you select the subscription, and then click Programmatic deployment.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

From the RG1 blade, click Deployments. You see a history of deployment for the resource group.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/templates/template-tutorial-create-first-template?tabs=azure-powershell>

Through activity logs, you can determine:

- * what operations were taken on the resources in your subscription
- * who started the operation
- * when the operation occurred
- * the status of the operation
- * the values of other properties that might help you research the operation

On the Azure portal menu, select Monitor, or search for and select Monitor from any page

2. Select Activity Log.

3. You see a summary of recent operations. A default set of filters is applied to the operations. Notice the information on the summary includes who started the action and when it happened.

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/view-activity-logs>

NEW QUESTION: 3

One of the activities in the Voice over WLAN Assessment service component of the plan phase involves analysis of the existing WLAN environment. Which one of these choices includes some of the tasks in this activity?

- A.** Identify Potential Interference Sources in the Designated Band, Determine Noise Floor and Signal Strength, Place Test Access Points in Proposed Locations.
- B.** Analysis of Proposed WLAN System With Respect to Availability, Capacity, Security, and Integration with Legacy Architecture.
- C.** Perform Gap Analysis According to Leading Practices, Compare Customer Processes with Operational Leading Practices for WLAN, Identify Legacy Application Integration Requirements.
- D.** Verify Device Access Security in the Customer Network, Perform an RF Site Survey, Identify Network Infrastructure Gaps and Remediation Plan.

Answer: A
