NEW QUESTION: 1

Which protocol is used to carry the media data endpoints?
Selece exactly 1 answer(3) from the following:

- A. H.323
- B. RTCP
- C. RTP
- D. SIP
- E. TCS4
- F. TCP/IP

Answer: C

NEW QUESTION: 2

An organization wants to be alerted when an unauthorized Amazon EC2 instance in its VPC performs a network port scan against other instances in the VPC. When the Security team performs its own internal tests in a separate account by using pre-approved

third-party scanners from the AWS Marketplace, the Security team also then receives multiple Amazon GuardDuty events from Amazon CloudWatch alerting on its test activities. How can the Security team suppress alerts about authorized security tests while still receiving alerts about the unauthorized activity?

- A.** Install the Amazon Inspector agent on the EC2 instances that the Security team uses.
- B.** Add the Elastic IP addresses of the Security team's EC2 instances to a trusted IP list in Amazon GuardDuty.
- C.** Grant the Security team's EC2 instances a role with permissions to call Amazon GuardDuty API operations.
- D.** Use a filter in AWS CloudTrail to exclude the IP addresses of the Security team's EC2 instances.

Answer: B

Explanation:

Trusted IP lists consist of IP addresses that you have whitelisted for secure communication with your AWS infrastructure and applications. GuardDuty does not generate findings for IP addresses on trusted IP lists. At any given time, you can have only one uploaded trusted IP list per AWS account per region. Threat lists consist of known malicious IP addresses. GuardDuty generates findings based on threat lists. At any given time, you can have up to six uploaded threat lists per AWS account per region.

https://docs.aws.amazon.com/guardduty/latest/ug/guardduty_upload_lists.html

NEW QUESTION: 3

A company wants to provision access to conference rooms using OIM. The reservation should contain the start and end date of the reservation, the name of the conference room, and the location code.

Which three steps are required to Implement a Disconnected Application Instance for

Conference Room access provisioning based on the previous description? (Choose three.)

- A.** Create a Sandbox in OIM Self Service Console.
- B.** Modify the Form generated by default when creating the Disconnected Application Instance.
- C.** Create a Disconnected Application Instance named "ConferenceRoom Reservation".
- D.** Create a Sandbox in OIM Administration Console.
- E.** Add a child form for the reservation entitlements.
- F.** Create a Form to represent a Conference Room Reservation.

Answer: B,C,D
