NEW QUESTION: 1
Considering the attached screenshot, on which host is the database of the system running?

A. This question cannot be answered with the information available.
B. twdf1576_DEV_00
C. DEV
D. twdf1576
Answer: D

NEW QUESTION: 2

A)

B)

C)

D)

A. Option C
B. Option A
C. Option D
D. Option B
Answer: A

NEW QUESTION: 3
You need to implement a solution that meets the collaboration requirements.
What should you do?
A. Create a new sharing policy.
B. Run the Set-CASMailbox cmdlet.
C. Modify the organization configuration.
D. Create an organization relationship.
Answer: D
Explanation:
* Scenario: Custom recipient MailTips created in the Exchange Server organization of Trey Research must be visible to the users at Fabrikam. The solution must ensure that administrators can define a subset of users who can share their MailTips.
* MailTips Over Organization Relationships
You may want to restrict certain types of MailTips. You can either allow all MailTips to be returned or allow only a limited set that would prevent NDRs. You can configure this setting with the MailTipsAccessLevel parameter on the Set-OrganizationRelationship cmdlet.

Reference: MailTips over organization relationships

Topic 5, Proseware, Inc

Overview

General Overview

Proseware, Inc., is an international manufacturing company that has 1,000 users.

Proseware has a sales department, a marketing department, a research department, and a human resources department.

Proseware purchases another company named Contoso, Ltd. Contoso has 500 users.

Physical Locations

Proseware has two main offices located in New York and London. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. Contoso has a single office in Dallas.

Existing Environment

Active Directory Environment

The Proseware network contains an Active Directory forest named proseware.com. The forest contains a single domain. All domain controllers run Windows Server 2012.

Each office contains three domain controllers. Each office is configured as an Active Directory site.

The Contoso network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2012.

Exchange Server Organization

Proseware has an Exchange Server 2013 organization that contains four servers. The servers are configured as shown in the following table.

EX3 and EX4 are the members of a database availability group (DAG) named DAG1.

DAG1 has two DAG networks. The networks are configured as shown in the following table.

Users connect to mail.proseware.com for Microsoft Outlook and Outlook Web App services. Mail.proseware.com resolves to an IP address on a hardware load balancer.

All Outlook Anywhere users are enabled for Cached Exchange Mode.

Proseware pilots a hybrid deployment of Exchange Server 2013 and Microsoft Office 365.

The mailbox of each pilot user is moved to Office 365. For the pilot mailboxes, all inbound email messages from the Internet are delivered to the Exchange Server organization, and then forwarded to Office 365.

Contoso has an Exchange Server 2010 organization.

Problem Statements

Proseware identifies the following issues:

* MapiNet is saturated with network traffic caused by the database replication between the members of DAG1 over MapiNet.

* The pilot users report that entries added to their Safe Senders list and their Blocked Senders list fail to work.

* A recent power outage in the New York office prevents all users from accessing their mailbox.
* A user named User1 reports that email messages are being sent from her mailbox without her consent.

Requirements

Planned Changes

Proseware plans to implement the following changes:

* Several users at Contoso will use a mailbox at Proseware as their primary mailbox. The Contoso users will use Autodiscover to configure their client settings and will use single sign-on.
* For a special project, an IT administrator will create 20 distribution groups that will each contain 200 members.
* Certain users in both companies will have a contoso.com SMTP suffix as their primary email address.

Technical Requirements

Proseware identifies the following technical requirements for the Exchange Server organization:

* Internal email messages must be rejected if the messages cannot be protected by using Shadow Redundancy.
* All database replication between DAG1 members must occur over the ReplNet network.

Site Resiliency Requirements

Proseware identifies the following site resiliency requirements for the Exchange Server organization:

* All mailboxes must be available if a single site becomes unavailable. The solution must not require administrator intervention.
* User traffic on the WAN links must be minimized.

Email Security Requirements

Proseware identifies the following requirements for securing email messages:

* Email recipients must be able to identify whether an email message was modified during delivery.
* All email messages stored in the mailbox databases must be protected from theft.
* Users must be able to encrypt email messages from Outlook Web App.

Retention Requirements

Proseware plans to reduce mailbox server storage usage and to limit company liability.

Proseware identifies the following requirements:

* Email messages in the Deleted Items folder must be retained for only 30 days.
* Email messages in a mailbox folder named Projects must be retained for 540 days, unless the messages contain contractual information.
* Email messages in the Projects folder that contain contractual information must be retained indefinitely.
* All other email messages must be removed after one year.
