Data blending is performed on a sheet-by-sheet basis and is
established when a field from a second data source is used in
the view. To create a blend in a workbook already connected to
at least two data sources, bring a field from one data source
to the sheet-it becomes the primary data source.
Switch to the other data source and use a field on the same
sheet-it becomes a secondary data source. An orange linking
icon will appear in the data pane, indicating which field(s)
are being used to blend the data sources.
