Explanation:

When using VLAN the number and size of collision domains remain the same ->.

VLANs allow to group users by function, not by location or geography ->.

VLANs help minimize the incorrect configuration of VLANs so it enhances the security of the network ->.

VLAN increases the size of broadcast domains but does not decrease the number of collision domains ->.

VLANs increase the number of broadcast domains while decreasing the size of the

broadcast domains which increase the utilization of the links.

It is also a big advantage of

VLAN ->.

VLANs are useful but they are more complex and need more administration ->.
