**Answer: C**

Explanation:

Explanation

Utility Collection Set Account

Specify a Windows domain account to run the SQL Server Utility collection set. This account is used as the SQL Server Agent proxy account for the SQL Server Utility collection set.

Alternatively, you can use the existing SQL Server Agent service account. To pass validation requirements, use the following guidelines to specify the account.

If you specify the SQL Server Agent service account option:

The SQL Server Agent service account must be a Windows domain account that is not a built-in account like LocalSystem, NetworkService, or LocalService.
