VM1 connects to VNET1.
You need to connect VM1 to VNET2.
Solution: You delete VM1. You recreate VM1, and then you create
a new network interface for VM1.
Does this meet the goal?
A. No
B. Yes
Answer: B
Explanation:
Instead you should delete VM1. You recreate VM1, and then you
add the network interface for VM1.

Note: When you create an Azure virtual machine (VM), you must create a virtual network (VNet) or use an existing VNet. You can change the subnet a VM is connected to after it's created, but you cannot change the VNet.
