**NEW QUESTION: 1**
Which one of the following is NOT a component of a CC Protection
Profile?
**A.** Product-specific security requirements
**B.** Target of Evaluation (TOE) description
**C.** Threats against the product that must be addressed
**D.** Security objectives
**Answer: A**
Explanation:
The correct answer is "Product-specific security requirements".
Product-specific security requirements for the product or system are contained in the Security Target (ST).
Additional items in the PP are:

TOE security environment description
Assumptions about the security aspects of the product's
expected use
Organizational security policies or rules
Application notes
Rationale

**NEW QUESTION: 2**
Given: When the CCMP cipher suite is used for protection of
data frames, 16 bytes of overhead are added to the Layer 2
frame. 8 of these bytes comprise the MIC.
What purpose does the encrypted MIC play in protecting the data
frame?
**A.** The MIC provides for a cryptographic integrity check against
the data payload to ensure that it matches the original
transmitted data.
**B.** The MIC is a hash computation performed by the receiver
against the MAC header to detect replay attacks prior to
processing the encrypted payload.
**C.** The MIC is used as a first layer of validation to ensure
that the wireless receiver does not incorrectly process
corrupted signals.
**D.** The MIC is a random value generated during the 4-way
handshake and is used for key mixing to enhance the strength of
the derived PTK.
**Answer: A**

**NEW QUESTION: 3**
R0 is a Juniper Networks MX router with dual Routing Engines.
You must load new software on R0 while ensuring no control
plane disruption and minimal data loss.
