They treat our products as the first choice and the total amounts of the clients and the sales volume of our CPMS-001 learning file is constantly increasing, Challenge some fresh and meaningful things, and when you complete CPMS-001 exam, you will find you have reached a broader place where you have never reach.

Our GAQM CPMS-001 test braindumps offer many advantages, the first and foremost of which is its comprehensive content.

#### **NEW QUESTION: 1**

Which two configurations provide the best SIP trunk redundancy with Cisco Unified Communications Manager? (Choose two.)

**A.** Configure all SIP trunks to point to a gatekeeper through

SIP to H.323 gateway

**B.** Configure all SIP trunks to point to a SIP gateway

**C.** Configure all SIP trunks with Cisco Unified Border Element

**D.** Configure all SIP trunks to allow TCP ports 5060

**E.** Configure SIP trunks to be members of route groups and route lists

**F.** Configure all SIP trunks with DNS SRV

**Answer: E,F**

Explanation:

Explanation/Reference:

Explanation:

For SIP trunks, Cisco Unified Communications Manager supports up to 16 IP addresses for each DNS

SRV and up to 10 IP addresses for each DNS host name. The order of the IP addresses depends on the

DNS response and may be identical in each DNS query. The OPTIONS request may go to a different set

of remote destinations each time if a DNS SRV record

(configured on the SIP trunk) resolves to more than

16 IP addresses, or if a host name (configured on the SIP trunk) resolves to more than 10 IP addresses.

Thus, the status of a SIP trunk may change because of a change in the way a DNS query gets resolved,

not because of any change in the status of any of the remote destinations.

### **NEW QUESTION: 2**

Which two statements about DTP are true? (Choose two)

**A.** Dynamic ports are vulnerable to attack from the rogue stations sending false DTP packets

**B.** When two ports set to dynamic auto mode negotiates with one another, they agree to operate as trunk ports

**C.** DTP negotiates the trunk native VLAN along with the trunking mode

**D.** DTP must be unconditionally enabled on links between switches in order to deploy VTP

**E.** When a port set to dynamic auto mode negotiates with a port set to trunk mode, they agree to operate as trunk ports

**Answer: C,E**

### **NEW QUESTION: 3**

You plan to create an Azure environment that will have a root management group and five child management groups. Each child management group will contain five Azure subscriptions. You plan to have between 10 and 30 resource groups in each subscription.

You need to design a solution for the planned environment. The solution must meet the following requirements:

Prevent users who are assigned the Owner role for the

subscriptions from deleting the resource groups from their respective subscription.

Ensure that you can update RBAC role assignments across all the subscriptions and resource groups.

Minimize administrative effort.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Azure Blueprints

Blueprints are a declarative way to orchestrate the deployment of various resource templates and other artifacts such as:

Role Assignments

Policy Assignments

Azure Resource Manager templates (ARM templates)

Resource Groups
