If you have bought made the payment, you will receive an email attached **CPQ-Specialist Training Material** with the Salesforce Certified CPQ Specialist test prep torrent in about 5-10mins, If you have any query or questions please join our Live Chat or Email to support.

We are the leading position with high passing rate of CPQ-Specialist test engine in this field recent years, To get a better and full understanding of our CPQ-Specialist quiz torrent, please read the introduction of the features and the advantages of our product as follow.

About our service, we want to express **CPQ-Specialist Training Material** with a saying goes like: There is no best only better.

NEW QUESTION: 1

- A. Option C
- B. Option B
- C. Option D
- D. Option A

Answer: D

Explanation:

If all of the routers are connected to each other using a layer 2 switch, then each router will only have the single switch port that it connects to as its neighbor. Even though multiple

routing neighbors can be formed over a layer 2 network, only the physical port that it connects to will be seen as a CDP neighbor. CDP can be used to determine the physical topology, but not necessarily the logical topology.

NEW QUESTION: 2

DynamoDB is a fully managed NoSQL database service that provides fast and predictable performance with seamless scalability. DynamoDB lets you offload the operational burdens of maintaining and scaling distributed systems so you can focus on your application. DynamoDB is designed to be a simple and cost-effective solution for building applications that need to store and retrieve large amounts of data. DynamoDB is a key-value and document database that combines the performance and availability of traditional databases with the flexibility and scalability of NoSQL databases.

- A. A table in DynamoDB can have a primary key with a maximum of 20 attributes.
- B. A table in DynamoDB can have a primary key with a maximum of 1 attribute.
- C. A table in DynamoDB can have a primary key with a maximum of 10 attributes.
- D. A table in DynamoDB can have a primary key with a maximum of 5 attributes.

Answer: B

Explanation:

A primary key in DynamoDB can have a maximum of 1 attribute.

DynamoDB is a fully managed NoSQL database service that provides fast and predictable performance with seamless scalability. DynamoDB lets you offload the operational burdens of maintaining and scaling distributed systems so you can focus on your application. DynamoDB is designed to be a simple and cost-effective solution for building applications that need to store and retrieve large amounts of data. DynamoDB is a key-value and document database that combines the performance and availability of traditional databases with the flexibility and scalability of NoSQL databases.
