NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question on the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage a solution in Azure. You configure Event Hubs to collect telemetry data from dozens of industrial machines. Hundreds of events per minute are logged in near real-time. You use this data to create dashboards for analysts.

The company is expanding their machinery and wants to know if the current telemetry solution will be sufficient to handle the volume of the increasing workload. The volume will increase 10 times by year end and on a regular basis thereafter. Latency will become more and more important as volume increases. Messages must be retained for a week. Data must be captured automatically without price increase.

You need to recommend a solution.

Solution: Use the fully-managed platform as a service option in the dedicated tier to handle the increased volume.

Does the solution meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Explanation

Azure Event Hubs Dedicated is ideal for customers that need a single-tenant deployment, not the fully-managed platform, to manage the most demanding requirements.
