NEW QUESTION: 1

A storage subsystems Web browser management interface reports that the subsystem has become degraded and remotely opens a service request with the vendor. Your vendors level three storage support engineer wants to remotely access your storage subsystem for troubleshooting.

What is a SNIA Storage Security Best Current Practices solution?

- A.** Provide a temporary user ID to allow the vendor's support engineer to access the Web browser management interface remotely over HTTP/TLS.
- B.** Open firewall ports to allow the vendor's support engineer to access the Web browser management interface.
- C.** Provide the vendor's support engineer with a shared remote control session where you can monitor what the support engineer is doing while troubleshooting the subsystem without needing to share credentials.
- D.** Provide the vendor's support engineer with a temporary user

ID that has sudo access to become a super user on the storage subsystem; this ensures an audit trail for all remote support activities.

Answer: C

NEW QUESTION: 2

Which IPv6 tunneling type establishes a permanent link between IPv6 domains over IPv4?

- A. ISATAP tunneling
- B. manual tunneling
- C. IPv4-compatible tunneling
- D. 6to4 tunneling

Answer: B

Explanation:

A manually configured tunnel is equivalent to a permanent link between two IPv6 domains over an IPv4 backbone.

The primary use is for stable connections that require regular secure communication between two edge routers or between an end system and an edge router, or for connection to remote IPv6 networks.
