You may get some detail about the C_HRHPC_2111 valid practice cram, All customers who purchased our C_HRHPC_2111 troytec pdf and practice test can enjoy one-year free update.

We assure you that Tinova-Japan will never leave you behind until you pass your C_HRHPC_2111 exam.

NEW QUESTION: 1

A. Option A

B. Option C
C. Option D
D. Option B
Answer: B
Explanation:
Explanation
The reason DSW2 has not become the active switch for Vlan103 is because the priority value of DSW1 is higher than that of DSW2. In order to make DSW2 become the active switch, we need to increase DSW2's priority (to higher than 200) or decrease DSW1's priority (to lower than 190) -> B and C are correct. But there is another requirement from this question that "A failure on gig1/0/1 on primary device should cause the primary device to release its status as the primary device, unless GigabitEthernet 1/0/1 on backup device has also failed". This requirement makes answer B incorrect. For example, we choose to decrease the priority value on DSW1 to 160 (according to answer B) then DSW2 will become active switch (that is good). When Gi1/0/1 on DSW2 goes down, the priority of DSW2 will be 190 - 50 = 140 < 160 -> DSW1 will become new active switch (it is good, too). But when Gi1/0/1 on DSW1 also goes down, the priority of DSW1 will be 160
- 10 = 150 and it is still greater than 140 of DSW2 -> DSW2 cannot retake the active role as the requirement of this question.

NEW QUESTION: 2
Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?
A. To coordinate with the other management frameworks in use
B. To identify and understand business requirements
C. To describe how an architecture addresses stakeholder concerns
D. To provide a system for continuous monitoring
E. To structure re-usable architecture and solution assets
Answer: E
