NEW QUESTION: 2

You are a licensing specialist. Your customer is A Datum Corporation, a fast-growing consulting company that specializes in customer relationship management solutions.

Company Background

A Datum Corporation owns the following interests in two other companies:

Owns 51 percent of Contoso, Ltd, which produces accounting systems management software.

Owns 100 percent of Fabrikam, Inc., which produces and administers customer service training.

The number of company employees is shown in the following table.

All three companies have a flexible work environment that allows employees to work from home.

Network Description

All employees of all three companies have their own desktop.

The desktops run either

Microsoft Windows 2000 Professional or Windows XP Professional, and various versions of

Microsoft Office.

The number of servers for each company is shown in the following table.

All servers currently run Windows 2000 Server.

The software refresh cycle is two years. However, it is difficult for the employees and the IT staff to keep current with the new technology.

Current Licensing Solution

The two affiliate companies do their own purchasing and often pay a higher price for their software than A Datum Corporation pays.

Business Goals

The three companies share many of the same customers and sometimes work on the same projects. The president of A Datum Corporation wants to implement Microsoft SharePoint Portal Server 2003 to allow the employees in all three companies to collaborate internally and to allow the customers of all three companies to access some of the data as needed.

The president of A Datum Corporation has the following goals:
Upgrade the servers in all three companies to Windows Server 2003.

Standardize operating systems across the companies.

Standardize desktop applications across the companies to decrease support costs.

Implement Microsoft Exchange across all three companies in the next six months so that all employees can use Outlook Web Access.

Sales are expected to increase significantly over the next three years, and the number of employees is also expected to increase.

End of repeated scenario

You need to advise the company when it should consider a licensing program change during the next three years.

Which change in the companys environment would require a change in the companys licensing program?

- A. an increase in the number of servers
- B. an increase in the number of office locations
- C. an increase in the number of customers
- D. an increase in the number of employees and desktops
