Many companies develop shoddy SCS-C01 training exam pdf to earn customers' money, We can give you free update for 365 days after your purchasing, These experts specialized in this area for so many years, so they know exactly what is going to be in your real test and they are not laymen at all, you just spend to 30 hours on the SCS-C01 study materials and you will not shy of the failure any longer because we are confident about our SCS-C01 study guide.

NEW QUESTION: 1

Which three statements are true about the CELLCLI command?

- A. It can be executed on storage servers.
- B. It can be executed using the DCLI utility.
- C. It has command-line history.
- D. It can execute commands on multiple storage servers in

parallel.

E. It requires root privileges to create CELLDISKS and GRIDDISKS.

Answer: A,B,C

Explanation:

The CellCLI utility supports command-line history.

Each Exadata Storage cell can be monitored, configured, and maintained using the cellcli command line interface.

The dcli utility facilitates centralized management across an Oracle Exadata Storage

Server Software realm by automating the execution of CellCLI commands on a set of cells and returning the output to the centralized management location where the dcli utility was run.

NEW QUESTION: 2

Refer to the exhibit.

Cisco 210-065 Exam

You have just finished installing a 65-inch dual profile system in a multipurpose room. After powering up the entire system, only one display is used. Using the information in the exhibit, why is the second display not displaying anything from the system?

A. The dual display option key has not been input into the codec.

B. The display is not powered on.

C. The codec has the appropriate option keys installed, so either the display is not cabled correctly, the codec is configured incorrectly, or there is no input being sent to the display.

D. The Cisco TelePresence profile systems do not support dual display.

Answer: C

NEW QUESTION: 3

Bob wants to configure multiple LDAP servers in his IBM WebSphere Portal Configuration.

Which principles must he adhere to when configuring the LDAP servers in WebSphere Portal?

A. The base entries must not overlap each other in the realm definitions.

B. The login attribute must be the same across all repositories

C. The distinguished names (DNs) must be unique in all repositories.

D. The relative distinguished name (RDN) attribute for users must be the same across all repositories.

Answer: D

NEW QUESTION: 4

You manage a collection of large video files that is stored in an Azure Storage account.

A user wants access to one of your video files within the next seven days.

You need to allow the user access only to the video file, and then revoke access once the user no longer needs it.

What should you do?

A. Create an access policy on the container. Give the external user a Shared Access Signature for the blob by using the policy. Once the user is done with the file, delete the policy.

B. Create an Ad-Hoc Shared Access Signature for the Blob resource. Set the Shared Access Signature to expire in seven days.

C. Give the user the secondary key for the storage account. Once the user is done with the file, regenerate the secondary key.

D. Create an access policy on the blob. Give the external user access by using the policy. Once the user is done with the file, delete the policy.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

By default, only the owner of the storage account may access blobs, tables, and queues within that account. If your service or application needs to make these resources available to other clients without sharing your access key, you have the following options for permitting access:
