Answer:
Explanation:

NEW QUESTION: 4
Given:

Which statement is true?
A. SportsCar must override methods defined by car.
B. SportsCar must implement methods define by convertible.
C. SportsCar must implement methods from TurboVehicle and steerable
D. Instances of car can invoke convertible methods.
Answer: B
Explanation:

Explanation/Reference:
Explanation:
To declare a class that implements an interface, you include an implements clause in the class declaration.
By convention, the implements clause follows the extends clause, if there is one.
Here are the some point that must be considered while implementing an interface (or interfaces) into a java class.
A class implementing an interface must either implement all the methods of that interface otherwise known
as the abstract class.
A class in java may extend at most one superclass because java does not allow multiple inheritance, by it
may implement more than one interface. Multiple inheritance in java is achieved through the interfaces.
When a class implements more than one interface then implement statement requires a comma-
separated list of interfaces to be implement by that class.
