Explanation:
Snapshot replication distributes data exactly as it appears at a specific moment in time and does not monitor for updates to the data. When synchronization occurs, the entire snapshot is generated and sent to Subscribers.
Using snapshot replication by itself is most appropriate when one or more of the following is true:
Data changes infrequently.

It is acceptable to have copies of data that are out of date with respect to the Publisher for a period of

time.
Replicating small volumes of data.

A large volume of changes occurs over a short period of time.
