NEW QUESTION: 2

You need to ensure receipt processing occurs correctly. What should you do?

- A. Use blob leases to prevent concurrency problems.
- B. Use blob properties to prevent concurrency problems.
- C. Use blob metadata to prevent concurrency problems.
- D. Use blob SnapshotTime to prevent concurrency problems.

Answer: D

Explanation:

You can create a snapshot of a blob. A snapshot is a read-only version of a blob that's taken at a point in time. Once a snapshot has been created, it can be read, copied, or deleted, but not modified. Snapshots provide a way to back up a blob as it appears at a moment in time.

Scenario: Processing is performed by an Azure Function that uses version 2 of the Azure Function runtime. Once processing is completed, results are stored in Azure Blob Storage and an Azure SQL database. Then, an email summary is sent to the user with a link to the processing report. The link to the report must remain valid if the email is forwarded to another user.

NEW QUESTION: 3

This question requires that you evaluate the underlined text to determine if it is correct.

You are an IT intern assigned to implement Microsoft Office 365 and Microsoft Intune.

You have not created any Intune policies. You want to control endpoint protection, software updates, and a policy check schedule for a group of devices.

You must deploy a mobile device security policy template.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. Microsoft Intune Agent Settings
- B. Windows Firewall Settings
- C. No change is needed.
- D. Microsoft Intune Center Settings

Answer: C

Explanation:

Microsoft Intune Policies are groups of settings that control features on mobile devices and computers. You create policies using templates that contain recommended or customized

settings, and then deploy them to device or user groups.
Reference: Use policies to manage computers and mobile devices with Microsoft Intune
