**NEW QUESTION: 1**

EC2, S3, IAM, AWS, and CloudFormation are examples of AWS services that are managed by AWS. Which of the following AWS services is not managed by AWS?  
A. Amazon S3  
B. Amazon EC2  
C. Amazon IAM  
D. Amazon CloudFormation

- A. Amazon S3
- B. Amazon EC2
- C. Amazon IAM
- D. Amazon CloudFormation

- C. EBS is replicated across multiple availability zones, but not across multiple regions.
- D. EBS is replicated across multiple availability zones, but not across multiple regions.

**Answer: B**

Explanation:

Explanation

Data stored in Amazon EBS volumes is redundantly stored in multiple physical locations as part of normal operation of those services and at no additional charge. However, Amazon EBS replication is stored within the same availability zone, not across multiple zones; therefore, it is highly recommended that you conduct regular snapshots to Amazon S3 for long-term data durability. Option A is invalid because there is no lifecycle policy for EBS volumes. Option C is invalid because there is no EBS volume replication. Option D is invalid because EBS volume encryption will not ensure business continuity.
