quality of the NSE7_SDW-6.4 practice materials is our lifeline.

So, no matter from which side, NSE7_SDW-6.4 test torrent is the most suitable choice.

NEW QUESTION: 1

Click the Exhibit button.

You administer AS 65000, and have deployed a route reflector (RR1) in your network as shown in the exhibit. The traffic between AS 65001 and AS 65002 is going through the route reflector, even though it is not the best path.

What will solve this problem?

- A. Change the IGP metric so it is lower on the preferred path.
- B. Change the LOCAL_PREF so that it uses the preferred path.
- C. Change the originator to be the preferred path.
- D. Remove the nhs policy.

Answer: D

NEW QUESTION: 2

With limited resources in the information security department, which of the following is the BEST approach for managing security risk?

- A. Engage a third-party company to provide security support.
- B. Implement technical solutions to automate security management activities.
- C. Hire additional information security staff.
- D. Prioritize security activities and report to management.

Answer: D

NEW QUESTION: 3

You have an on-premises data center and an Azure subscription. The data center contains two VPN devices.

The subscription contains an Azure virtual network named VNet1. VNet1 contains a gateway subnet.

You need to create a site-to-site VPN. The solution must ensure that if a single instance of an Azure VPN gateway fails, or a single on-premises VPN device fails, the failure will not cause an interruption that is longer than two minutes.

What is the minimum number of public IP addresses, virtual network gateways, and local network gateways required in Azure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: 4

Two public IP addresses in the on-premises data center, and two public IP addresses in the VNET.

The most reliable option is to combine the active-active gateways on both your network and Azure, as shown in the diagram below.

Box 2: 2

Every Azure VPN gateway consists of two instances in an active-standby configuration. For any planned maintenance or unplanned disruption that happens to the active instance, the standby instance would take over (failover) automatically, and resume the S2S VPN or VNet-to-VNet connections.

Box 3: 2

Dual-redundancy: active-active VPN gateways for both Azure and on-premises networks References:

<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-highlyavailable>

NEW QUESTION: 4

Which policies apply to which devices? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:
