Answer: C

NEW QUESTION: 2

Refer to the following chart.

With respect to the two years during which combined legal and production expenses were most nearly the same, average marketing expenses per year were approximately

- A. \$6.2 million
- B. \$7.2 million
- C. \$8.0 million
- D. \$6.8 million
- E. \$5.5 million

Answer: A

Explanation:

Explanation/Reference:

Explanation:

First determine aggregate legal and production expenses for each year shown (approximations will suffice; all numbers here are in millions):

2002: 5.0 + 5.7 = 10.7

2003: 4.1 + 5.2 = 9.3

2004: 4.0 + 11.3 = 15.3

2005: 10.4 + 5.6 = 16.0

2006: 6.1 + 4.6 = 10.7

The aggregate amount was most nearly equal for the years 2002 and 2006. Next, determine the average annual marketing expenses for these two years. (Again, approximations will suffice.) The average of \$4.1m (2002 marketing expenses) and \$8.3m (2006 marketing expenses) is \$6.2m.

NEW QUESTION: 3

You executed this command to create a password file:

```
$ orapwd file = orapworcl entries = 10 ignorecase = N
```

Which two statements are true about the password file? (Choose two.)

- A. It will not permit the use of mixed case passwords for the database users who have been granted the SYSDBA role.
- B. It contains usernames and passwords of database users who are members of the OSDBA operating system group.
- C. It contains username and passwords of database users who are members of the OSOPER operating system group.
- D. It will permit the use of lowercase passwords for database users who have granted the SYSDBA role.
- E. It will permit the use of uppercase passwords for database users who have been granted the SYSOPER role.

Answer: D,E

Explanation:

Explanation

* You can create a password file using the password file creation utility, ORAPWD.

* Adding Users to a Password File

When you grant SYSDBA or SYSOPER privileges to a user, that user's name and privilege information are added to the password file. If the server does not have an EXCLUSIVE password file (that is, if the initialization parameter REMOTE_LOGIN_PASSWORDFILE is NONE or SHARED, or the password file is missing), Oracle Database issues an error if you attempt to grant these privileges.

A user's name remains in the password file only as long as that user has at least one of these two privileges. If you revoke both of these privileges, Oracle Database removes the user from the password file.

* The syntax of the ORAPWD command is as follows:

```
ORAPWD FILE=filename [ENTRIES=numusers]
[FORCE={Y|N}] [IGNORECASE={Y|N}] [NOSYSDBA={Y|N}]
```

* IGNORECASE

If this argument is set to y, passwords are case-insensitive. That is, case is ignored when comparing the password that the user supplies during login with the password in the password file.
