NEW QUESTION: 1

Several employees at your company have been creating projects with Cloud Platform and paying for it with their personal credit cards, which the company reimburses. The company wants to centralize all these projects under a single, new billing account. What should you do?

- A.** In the Google Platform Console, go to the Resource Manage and move all projects to the root Organizarion.
- B.** Create a ticket with Google Support and wait for their call to share your credit card details over the phone.
- C.** Contact [\[email protected\]](#) with your bank account details and request a corporate billing account for your company.
- D.** In the Google Cloud Platform Console, create a new billing account and set up a payment method.

Answer: D

NEW QUESTION: 2

DRAG DROP

You deploy Windows 7 on client computers by using a default Windows 7 DVD.

You discover that the client computers use the most recently released critical updates. You download the updates' package files from the Microsoft site to your desktop.

You need to prepare a new installation DVD that includes the updates.

What should you do? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation:

Explanation:

Box 1: Copy the install.wim file from the original DVD to your desktop.

Box 2: Mount the install.wim file.

Box 3: Use the DISM tool to update the image.

Box 4: Commit changes and unmount the install.wim file.

Box 5: Burn a new DVD. Note: Applying Windows Updates to a base WIM using DISM and Powershell Firstly, locate your most up to date image and make a copy of it. This is so we can stream the newest Windows Updates into the mounted WIM without risk of damaging a working WIM. I suggest copying the WIM to a temp location. Also, put the Windows Update that you want to apply into an Updates folder.

Next, mount your image in the temp location.

```
DISM \Mount-Wim /WimFile:C:\TempMount\install.wim /index:1  
/Mountdir:C:\TempMount\Mount Now inject the Windows Update you  
need to apply
```

```
DISM /image:C:\TempMount\Mount /Add-Package
```

```
/Packagepath:C:\Updates\ Finally, save an unmount the image
```

```
DISM /Unmount-Wim /Mountdir:C:\TempMount\Mount /commit DISM  
/Cleanup-Wim
```

Reference: Applying Windows Updates to a base WIM using DISM and Powershell

NEW QUESTION: 3

When a customer is using HP CloudSystem, what does HP use to provide repeatable, proven deployments?

- A. Datacenter Care Packs
- B. HP OneView
- C. HP Cloud Maps
