software and middleware between them

**Answer: C**

**NEW QUESTION: 2**

An organization is converting a physical SQL server into a virtual server. The SQL database has been in use for several years and contains critical data for the organization. Which of the following conversion methods would be MOST appropriate?

- A. Automated offline
- B. Manual offline
- C. Automated online
- D. Manual online

**Answer: C**

**NEW QUESTION: 3**

You administer Windows 10 Enterprise client computers that are members of an Active Directory domain that includes Active Directory Certificate Services (AD CS).

You restored a computer from a backup that was taken 45 days ago. Users are no longer able to log on to that computer by using their domain accounts. An error message states that the trust relationship between the computer and the primary domain has failed.

What should you do?

- A. Renew the certificates issued to the client computer.
- B. Logon as a local administrator and issue the netdom resetpwd command. Log off and restart the computer.
- C. Restore the client computer from a known good backup that was taken two weeks earlier than the backup you previously restored.
- D. Reset the passwords of all affected domain users.

**Answer: B**
