NEW QUESTION: 1

$\frac{1}{2} \times 5,000 = 2,500$

$10 \times 10,000 = 100,000$

- A. 180,000
- B. 30,000
- C. 120,000
- D. 150,000

Answer: B

Explanation:

Return on investment = Net profit / Investment

where: Net profit = gross profit - expenses.

or

Return on investment = (gain from investment - cost of investment) / cost of investment

Subscriptions = 5,000 x 12 = 60,000 per annum

10 incidents @ 10,000 = 100,000 per annum reduce by 50% = 50,000 per annum

Thus the rate of Return is -10,000 per annum and that makes for -\$30,000 after three years.
