#### **NEW QUESTION: 1**

You need to use an Azure logic app to receive a notification when an administrator modifies the settings of a virtual machine in a resource group named RG1.

Which three components should you create next in the Logic Apps Designer? To answer, move the appropriate components from the list of components to the answer area and arrange them in the

correct order.

**Answer:**

Explanation:

Explanation:

Step 1: an Azure Event Grid trigger

First add an Event grid trigger that monitors the resource group for your virtual machine.

Step 2: a conditional control

To run your logic app workflow only when a specific event happens, add a condition that checks for virtual machine "write" operations.

Step 3: an action

Now add an action so that you get an email when the specified condition is true.

**NEW QUESTION: 2**

A company has placed a networked PC in a lobby so guests can have access to the corporate directory.

A security concern is that someone will disconnect the directory PC and re-connect their laptop computer and have access to the corporate network. For the port servicing the lobby, which three configuration steps should be performed on the switch to prevent this?

(Choose three.)

- A. Set the port security aging time to 0.
- B. Configure the switch to discover new MAC addresses after a set time of inactivity.
- C. Create the port as a protected port.
- D. Create the port as a trunk port.
- E. Create the port as an access port.
- F. Statically assign the MAC address to the address table.
- G. Enable port security.

**Answer: E,F,G**

Explanation:

If port security is enabled and the port is only designated as access port, and finally static MAC address is assigned, it ensures that even if a physical connection is done by taking out the directory PC and inserting personal laptop or device, the connection cannot be made to the corporate network, hence ensuring safety.

**NEW QUESTION: 3**
