Many exam candidates attach great credence to our DA-100 simulating exam, You can contact us when you need help with our Analyzing Data with Microsoft Power BI real dumps or any problems about the IT certification exams.

### NEW QUESTION: 1

Amazon

Amazon Macie is a managed service that uses machine learning to discover and protect sensitive data in Amazon S3 buckets and Amazon Elastic File System (EFS) file systems. Macie can identify sensitive data, such as personally identifiable information (PII), and generate alerts when it is discovered. Macie can also generate reports that show the location of sensitive data and the actions that can be taken to protect it.

Amazon Inspector is a managed service that automatically assesses the security and compliance of applications deployed on AWS. Amazon Inspector automatically assesses the security and compliance of applications deployed on AWS.

- A. Amazon Macie
- B. Amazon Inspector
- C. Amazon S3
- D. Amazon Elastic File System (EFS)

**Answer: D**

Explanation:

Amazon Inspector is an automated security assessment service that helps improve the security and compliance of applications deployed on AWS. Amazon Inspector automatically assesses

applications for exposure, vulnerabilities, and deviations from best practices. After performing an assessment, Amazon Inspector produces a detailed list of security findings prioritized by level of severity. These findings can be reviewed directly or as part of detailed assessment reports which are available via the Amazon Inspector console or API. Reference:

**NEW QUESTION: 2**

Refer to the exhibit.

When a network administrator is attempting an SSH connection to the device, in which order does the device check the login credentials?

- A. RADIUS server, line password, local username
- B. Line password, local username, RADIUS server
- C. Line password, RADIUS server, local username
- D. RADIUS server, local username, line password

**Answer: D**

**NEW QUESTION: 3**

Scenario: A company has a multi-region, multi-availability zone architecture. The company has a central region (us-east-1) and two edge regions (us-west-2 and eu-west-1). The company has a central vault (Vault1) in us-east-1 and two edge vaults (Vault2 and Vault3) in us-west-2 and eu-west-1 respectively. The company has a central storage bucket (Storage1) in us-east-1 and two edge storage buckets (Storage2 and Storage3) in us-west-2 and eu-west-1 respectively. The company has a central database (DB1) in us-east-1 and two edge databases (DB2 and DB3) in us-west-2 and eu-west-1 respectively. The company has a central application (App1) in us-east-1 and two edge applications (App2 and App3) in us-west-2 and eu-west-1 respectively. The company has a central service (Service1) in us-east-1 and two edge services (Service2 and Service3) in us-west-2 and eu-west-1 respectively. The company has a central IAM role (Role1) in us-east-1 and two edge IAM roles (Role2 and Role3) in us-west-2 and eu-west-1 respectively. The company has a central IAM user (User1) in us-east-1 and two edge IAM users (User2 and User3) in us-west-2 and eu-west-1 respectively. The company has a central IAM group (Group1) in us-east-1 and two edge IAM groups (Group2 and Group3) in us-west-2 and eu-west-1 respectively. The company has a central IAM policy (Policy1) in us-east-1 and two edge IAM policies (Policy2 and Policy3) in us-west-2 and eu-west-1 respectively. The company has a central IAM role (Role1) in us-east-1 and two edge IAM roles (Role2 and Role3) in us-west-2 and eu-west-1 respectively. The company has a central IAM user (User1) in us-east-1 and two edge IAM users (User2 and User3) in us-west-2 and eu-west-1 respectively. The company has a central IAM group (Group1) in us-east-1 and two edge IAM groups (Group2 and Group3) in us-west-2 and eu-west-1 respectively. The company has a central IAM policy (Policy1) in us-east-1 and two edge IAM policies (Policy2 and Policy3) in us-west-2 and eu-west-1 respectively.

Question: A company has a multi-region, multi-availability zone architecture. The company has a central region (us-east-1) and two edge regions (us-west-2 and eu-west-1). The company has a central vault (Vault1) in us-east-1 and two edge vaults (Vault2 and Vault3) in us-west-2 and eu-west-1 respectively. The company has a central storage bucket (Storage1) in us-east-1 and two edge storage buckets (Storage2 and Storage3) in us-west-2 and eu-west-1 respectively. The company has a central database (DB1) in us-east-1 and two edge databases (DB2 and DB3) in us-west-2 and eu-west-1 respectively. The company has a central application (App1) in us-east-1 and two edge applications (App2 and App3) in us-west-2 and eu-west-1 respectively. The company has a central service (Service1) in us-east-1 and two edge services (Service2 and Service3) in us-west-2 and eu-west-1 respectively. The company has a central IAM role (Role1) in us-east-1 and two edge IAM roles (Role2 and Role3) in us-west-2 and eu-west-1 respectively. The company has a central IAM user (User1) in us-east-1 and two edge IAM users (User2 and User3) in us-west-2 and eu-west-1 respectively. The company has a central IAM group (Group1) in us-east-1 and two edge IAM groups (Group2 and Group3) in us-west-2 and eu-west-1 respectively. The company has a central IAM policy (Policy1) in us-east-1 and two edge IAM policies (Policy2 and Policy3) in us-west-2 and eu-west-1 respectively. The company has a central IAM role (Role1) in us-east-1 and two edge IAM roles (Role2 and Role3) in us-west-2 and eu-west-1 respectively. The company has a central IAM user (User1) in us-east-1 and two edge IAM users (User2 and User3) in us-west-2 and eu-west-1 respectively. The company has a central IAM group (Group1) in us-east-1 and two edge IAM groups (Group2 and Group3) in us-west-2 and eu-west-1 respectively. The company has a central IAM policy (Policy1) in us-east-1 and two edge IAM policies (Policy2 and Policy3) in us-west-2 and eu-west-1 respectively.

**Answer:**

Explanation:

Explanation

Box 1: VM1 only

VM1 is in the same region as Vault1.

File1 is not in the same region as Vault1.

SQL is not in the same region as Vault1.

Blobs cannot be backup up to service vaults.

Note: To create a vault to protect virtual machines, the vault must be in the same region as the virtual machines.

Box 2: Share1 only.

Storage1 is in the same region (West USA) as Vault2. Share1 is in Storage1.

Note: After you select Backup, the Backup pane opens and

prompts you to select a storage account from a list of discovered supported storage accounts. They're either associated with this vault or present in the same region as the vault, but not yet associated to any Recovery Services vault.
