The client can decide which JN0-212 version to choose according their hobbies and their practical conditions, If you have any question about the JN0-212 exam pass-sure files, you can leave us a message on the web page or email us.

NEW QUESTION: 1

You are creating a machine learning model. You have a dataset that contains null rows.

You need to use the Clean Missing Data module in Azure Machine Learning Studio to identify and resolve the null and missing data in the dataset.

Which parameter should you use?

- A. Replace with mean
- B. Remove entire column
- C. Hot Deck
- D. Remove entire row

Answer: B

Explanation:

Remove entire row: Completely removes any row in the dataset that has one or more missing values. This is useful if the missing value can be considered randomly missing.

<https://docs.microsoft.com/en-us/azure/machine-learning/studio-module-reference/clean-missing-data>

NEW QUESTION: 2

You changed a role name by using Oracle Identity Self Service, However, you realize that the User Profile Audit (UPA) tables in the database are not updated.

What should you do?

- A. Disable the XL.UserProfileAuditDataCollectionsystem property to allow changes through Self-Service Console.
- B. Update role names through the UGP table only.
- C. Manually update the User Policy Profile data (UPD).
- D. Nothing. The change will be shown during the next snapshot of the user.

Answer: D

NEW QUESTION: 3

The question below is based on the following information:

{exhibit 1528}

What is the available capacity in hours for a 20-workday month?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

NEW QUESTION: 4

An administrator is attempting to power on a virtual machine with 32GB of memory. The operation fails with the following error:

Could not power on VM: No space left on device

Checking the space on the virtual machine's datastore, there is 30GB free.

Which action would allow the VM to power on?

- A. Set a 2GB memory reservation on the VM.
- B. Mount the virtual disk from the affected VM on to another virtual machine and free up space from within the OS.
- C. Enable vSphere HD admission control on the cluster in which the VM resides.
- D. Set a 2GB memory limit on the VM.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

The swap file size can be calculated with the formula ($\text{File} = \text{Allocated Memory} - \text{Memory Reservation}$).

As per default, the reservation is set to 0, so the .vswp file size is equal to the amount of virtual memory.
