Click the Exhibit button.

Traffic with the IP precedence value af21 ingresses the router and should be rewritten with the same value as it egresses; however, this traffic is rewritten to a different value.

Referring to the exhibit, what is the source of this problem?

- A. The BA classifier is assigning the traffic to the best-effort queue with a low loss priority.
- B. The BA classifier is assigning the traffic to the best-effort queue with a high loss priority.
- C. The BA classifier is assigning the traffic to the expedited forwarding queue with a high loss priority.
- D. The BA classifier is assigning the traffic to the expedited forwarding queue with a low loss priority.

**Answer: D**

### NEW QUESTION: 2

A client wants to create a scalable set of microservices that communicate with each other, where multiple microservices have a public REST API.

Which architecture strategy allows this on Heroku?

- A. Each microservice is a separate process type in a single Heroku app. The microservices communicate by using Redis as a message bus.
- B. Each microservice is a separate private space. The microservices communicate by using DNS Service Discovery.
- C. Each microservice is a separate Heroku app. The microservices communicate by using Apache Kafka as a message bus.
- D. Each microservice is a separate process in a single Heroku app. The microservices communicate by using shared memory.

**Answer: B**
