Speaking a passphrase into a voice print analyzer is an example of which of the following security concepts?

- A. Single sign-on
- B. Identification and authorization
- C. Single factor authentication
- D. Two factor authentication

Answer: D

Explanation:

Two-factor authentication is when two different authentication factors are provided for authentication purposes.

Speaking (Voice) - something they are.

Passphrase - something they know.

Incorrect Answers:

B. Identification is the act of claiming an identity using a single authentication factor, and authorization controls what a subject can and can't do, access, use, or view.

C. Single sign-on (SSO) is to give users access to all the applications and systems they need when they log on.

D. Single factor authentication only requires one authentication factor for authentication purposes.
