Our system will supplement new 250-575 latest exam file and functions according to the clients' requirements and surveys the clients' satisfaction degrees about our 250-575 cram materials.

It will be your best auxiliary tool on your path of review preparation, So if you use our 250-575 study materials you will pass the test with high success probability.

NEW QUESTION: 1

Hinweis: Diese Frage ist Teil einer Reihe von Fragen, die dasselbe Szenario darstellen. Jede Frage in der Reihe enthält eine eindeutige Lösung, mit der die angegebenen Ziele erreicht werden können. Einige Fragensätze haben möglicherweise mehr

als eine richtige Lösung, während andere möglicherweise keine richtige Lösung haben.

Nachdem Sie eine Frage in diesem Abschnitt beantwortet haben, können Sie NICHT mehr darauf zurückgreifen. Infolgedessen werden diese Fragen nicht im Überprüfungs Bildschirm angezeigt.

Ihr Netzwerk enthält eine lokale Active Directory-Domäne. Die Domäne enthält 2.000 Computer, auf denen Windows 8.1 ausgeführt wird und auf denen Anwendungen installiert sind (siehe folgende Tabelle).

You enroll all the computers in Upgrade Readiness.

You need to ensure that App1 and App2 have an UpgradeDecision status of Ready to upgrade.

Solution: You set the ReadyForWindows status of App1 to Highly adopted.

Does this meet the goal?

A. No

B. Yes

Answer: A

Explanation:

Explanation

App1 has a "low install count" (2% or less) so will be Ready to upgrade. We need to change the setting for App2.

NEW QUESTION: 2

For which three reasons would a voice engineer create a separate user template in Cisco Unity Connection? (Choose three.)

A. Certain users are using a different call handler.

B. Certain users are in a different partition.

C. Certain users are being moved to a different branch office.

D. Certain users changed their extensions.

E. Certain users are being added to Cisco Unified Presence Server.

F. Certain users are using a different phone system.

Answer: A,B,F

NEW QUESTION: 3

Your company has a main office and a branch office. The main office is located in Seattle. The branch office is located in Montreal. Each office is configured as an Active Directory site.

The network contains an Active Directory domain named adatum.com. The Seattle office contains a file server named Server1. The Montreal office contains a file server named

Server2.

The servers run Windows Server 2012 R2 and have the File and Storage Services server role, the DFS Namespaces role service, and the DFS Replication role service installed.

Server1 and Server2 each have a share named Share1 that is replicated by using DFS Replication.

You need to ensure that users connect to the replicated folder in their respective office when they connect to \\contoso.com\Share1.

Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

- A. Create a replication connection.
- B. Share and publish the replicated folder.
- C. Modify the Referrals settings.
- D. Create a new topology.
- E. Create a namespace.

Answer: B,C,E

Explanation:

To share a replicated folder and publish it to a DFS namespace Click Start, point to Administrative Tools, and then click DFS Management. In the console tree, under the Replication node, click the replication group that contains the replicated folder you want to share. In the details pane, on the Replicated Folders tab, right-click the replicated folder that you want to share, and then click Share and Publish in Namespace. In the Share and Publish Replicated Folder Wizard, click Share and publish the replicated folder in a namespace, and then follow the steps in the wizard.

Note that: If you do not have an existing namespace, you can create one in the Namespace Path page in the Share and Publish Replicated Folder Wizard. To create the namespace, in the Namespace Path page, click Browse, and then click New Namespace.

To create a namespace Click Start, point to Administrative Tools, and then click DFS Management.

In the console tree, right-click the Namespaces node, and then click New Namespace.

Follow the instructions in the New Namespace Wizard.

To create a stand-alone namespace on a failover cluster, specify the name of a clustered file server instance on the Namespace Server page of the New Namespace Wizard.

Important

Do not attempt to create a domain-based namespace using the Windows Server 2008 mode unless the forest functional level is Windows Server 2003 or higher. Doing so can result in a namespace for which you cannot delete DFS folders,

yielding the following error

message: "The folder cannot be deleted. Cannot complete this function."

To share a replicated folder and publish it to a DFS namespace
1. Click Start, point to Administrative Tools, and then click DFS Management.

2. In the console tree, under the Replication node, click the replication group that contains the replicated folder you want to share.

3. In the details pane, on the Replicated Folders tab, right-click the replicated folder that you want to share, and then click Share and Publish in Namespace.

4. In the Share and Publish Replicated Folder Wizard, click Share and publish the replicated folder in a namespace, and then follow the steps in the wizard.

"You need to ensure that users connect to the replicated folder in their respective office when they connect to \\contoso.com\Share1."
