Normally, you can get our C_SAC_2215 practice questions in a few minutes after purchase with high efficiency, So do not need to hesitate and purchase our Certified Application Associate - SAP Analytics Cloud study materials, you will not regret for

it.

NEW QUESTION: 1

You manage a network that includes an on-premises Active Directory Domain Services domain and an Azure Active Directory (Azure AD).

Employees are required to use different accounts when using on-premises or cloud resources. You must recommend a solution that lets employees sign in to all company resources by using a single account. The solution must implement an identity provider.

You need provide guidance on the different identity providers. How should you describe each identity provider? To answer, select the appropriate description from each list in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box1: User management occurs on-premises. Azure AD authenticates employees by using on-premises passwords. Azure AD Domain Services for hybrid organizations Organizations with a hybrid IT infrastructure consume a mix of cloud resources and on-premises resources.

Such organizations synchronize identity information from their on-premises directory to their Azure AD tenant. As hybrid organizations look to migrate more of their on-premises applications to the cloud, especially legacy directory-aware applications, Azure AD Domain Services can be useful to them.

Example: Litware Corporation has deployed Azure AD Connect, to synchronize identity information from their on-premises directory to their Azure AD tenant. The identity information that is synchronized includes user accounts, their credential hashes for authentication (password hash sync) and group memberships.

User accounts, group memberships, and credentials from Litware's on-premises directory are synchronized to Azure AD via Azure AD Connect. These user accounts, group memberships, and credentials are automatically available within the managed domain.

Box 2: User management occurs on-premises. The on-premises domain controller authenticates employee credentials. You can federate your on-premises environment with Azure AD and use this federation for authentication and authorization. This sign-in method ensures that all user authentication occurs on-premises.

NEW QUESTION: 2

Use the two sequential request to answer the question below.

Assume custom eVar persist throughout the visit

What conclusion you draw from the sequential image request above? Select two.

- A. Product abc can be tied to custom events5 as long as s, products expiration is set to visit or longer
- B. Revenue field in s,product is missing the currency symbol, such as 5 and therefore will not be counted as revenue
- C. Prop5 and prop7 can be used together in reporting since they are set I the same image request
- D. Product abc can be tied to scAdd in reports since they are set in the same image request
- E. Even through eVar5 and eVar7 were not set previous to Request #2 they can be tied to scAdd sionce both eVars have expiration set to visit

Answer: C

NEW QUESTION: 3

ABC company is implementing Oracle Fusion Core HR product only and has not licensed any other Management product. As an implementation consultant, you can still set up talent notifications via "Manage Notifications Setup" page, because this setup page is 'owned' by _____.

- A. Oracle Fusion Performance Management
- B. Oracle Fusion Talent Review
- C. Oracle Fusion Compensation Management
- D. Oracle Fusion Profile Management
- E. Oracle Fusion Goal Management

Answer: E

Explanation:

In the Define Worker Goal Setting activity, human resource (HR) specialists can

manage performance and development goal plans, assign goals to workers using a mass process, administer worker goals, and manage the goal library.

For setup tasks only, the HR specialist can also:

*Set profile options to specify the Oracle Fusion Goal Management features that your organization will use, such as the goal library, and goal plans, and approvals.

*Manage common lookups and update those that have user or extensible customization levels.

*Manage e-mail notification settings that are sent to workers and managers reminding them of upcoming events and approvals.

Note: Talent Management include
*Oracle Fusion Goal Management
*Oracle Fusion Performance Management
*Oracle Fusion Talent Review
*Oracle Fusion Workforce Compensation
*Oracle Fusion Network at Work
*Oracle fusion Incentive Compensation

NEW QUESTION: 4

You have a site that has two Internet connections but no switch on the outside of the firewall. You want to use ISP-A over ISP-B during normal operations.

Which type of chassis cluster design would you propose to satisfy this requirement?

- A. Propose active/active cluster deployment with separate redundancy groups
- B. Propose active/passive cluster deployment without separate redundancy groups
- C. Propose active/active cluster deployment without separate redundancy groups
- D. Propose active/passive cluster deployment with separate redundancy groups

Answer: A
