Sie mÃ¼ssen App2 implementieren, um die Anwendung zu erfÃ¼llen? WÃ¤hlen Sie zum Beantworten die entsprechenden Optionen im

Antwortbereich aus.

HINWEIS: Jede richtige Auswahl ist einen Punkt wert.

**Answer:**

Explanation:

Explanation

Box 1: Standard

Not Shared: A Shared plan does not support Always on.

Box 2: Always on

If your function app is on the Consumption plan, there can be up to a 10-minute delay in processing new blobs if a function app has gone idle. To avoid this cold-start delay, you can switch to an App Service plan with Always On enabled, or use a different trigger type.

Scenario: A newly developed API must be implemented as an Azure function named App2. App2 will use a blob storage trigger. App2 must process new blobs immediately.

App2 must be able to connect directly to the private IP addresses of the Azure virtual machines. App2 will be deployed directly to an Azure virtual network.

The cost of App1 and App2 must be minimized.
