Easy and Understandable Reading Layouts of COF-R02 exam dumps pdf to enhance the readability of our customers, COF-R02 study guide can bring you more than you wanted.

#### **NEW QUESTION: 1**

Your company has a private cloud that is managed by using a System Center 2012 infrastructure.

You deploy Data Protection Manager (DPM) to a server named DPM1.

A server named Server1 has the Hyper-V server role installed and hosts a virtual machine named VM1.

From DPM1, you perform a full backup of Server1.

You discover that you are unable to restore individual files from VM1.

You need to ensure that you can restore individual files from VM1 by using the DPM Administrator console.

What should you do first?

**A.** On DPM1, attach the VHD of VM1.

**B.** On DPM1, install the Hyper-V server role.

- C. On VM1, install Windows Server Backup.
- D. On VM1, install the integration features.

**Answer: B**

Explanation:

The integration features are also required but the "first" step according to the link below is to install the Hyper-V role on the DPM server.

**NEW QUESTION: 3**

An engineer is designing an EIGRP network for a small branch site where there is only one Layer 3 router. The engineer wants the router to advertise the local LAN network to remote EIGRP neighbors without sending any unnecessary multicast messages on the local LAN. Which action should the engineer take?

- A. Advertise the local LAN subnet as a stub network
- B. Use a static default route for this site instead of EIGRP
- C. Redistribute the local LAN network using the redistribute connected command
- D. Advertise the local LAN using the network command and the passive-interface feature

**Answer: D**
