NEW QUESTION: 1

In a traditional 3 tier topology, an engineer must explicitly configure a switch as the root bridge and exclude it from any further election process for the spanning-tree domain. Which action accomplishes this task?

- A.** Configure BPDU guard in all switch-to-switch connections.
- B.** Configure the spanning-tree priority to 32768
- C.** Configure the spanning-tree priority equal to 0.
- D.** Configure root guard and portfast on all access switch ports.

Answer: D

Explanation:

Root guard does not allow the port to become a STP root port, so the port is always STP-designated. If a better BPDU arrives

on this port, root guard does not take the BPDU into account and elect a new STP root. Instead, root guard puts the port into the root-inconsistent STP state which is equal to a listening state. No traffic is forwarded across this port.

NEW QUESTION: 2

A customer has purchased Server Automation Ultimate Edition and also uses HP Operations Manager.

What is a natural up-sell for this customer?

- A. HP Vertica
- B. HP Quality Center
- C. HP Performance Center
