They are the most comprehensive source of information, Just use your computer, IPAD or phone, then you can study with our 350-901 practice questions, Tinova-Japan is a professional website provides 350-901 exam questions torrent and 350-901 pdf study material.

For all of our 350-901 exam dumps products, we are providing 90 days free updates from the date of purchase.

NEW QUESTION: 1

A liquid's boiling point is the temperature at which the pressure of its escaping vapor is equal to the atmospheric pressure.

Reduced pressure on the surface of a liquid results in a reduction in the vapor pressure needed for boiling to occur. At higher elevations, thinner air causes a reduction in atmospheric pressure, and liquids boil at lower temperatures. At lower elevations, the atmospheric pressure is higher, and liquids boil at higher temperatures.

If Diane boiled water for coffee while camping in the mountains, which statement best describes what would happen to the water?

- A. change to steam before it had a chance to boil
- B. not boil at the high elevation in the mountains
- C. boil at a higher temperature than it would at a lower elevation

D. boil at a lower temperature than it would at a lower elevation

E. boil at the same temperature as it would at a lower elevation

Answer: D

NEW QUESTION: 2

You have a server named Server1 that has a Server Core installation of Windows Server 2008 R2.

Server1 has the DHCP Server server role and the File Server server role installed.

You need to upgrade Server1 to Windows Server 2012 R2 with the graphical user interface (GUI).

The solution must meet the following requirements:

- Preserve the server roles and their configurations.
- Minimize administrative effort.

What should you do?

A. On Server1, run setup.exe from the Windows Server 8 installation media and select Server with a GUI.

B. Start Server1 from the Windows Server 8 installation media and select Server with a GUI.

C. Start Server1 from the Windows Server 8 installation media and select Server Core

Installation.

When the installation is complete, add the Server Graphical Shell feature.

D. On Server1, run setup.exe from the Windows Server 8 installation media and select Server Core Installation.

When the installation is complete, add the Server Graphical Shell feature.

Answer: D

Explanation:

A). Server is on 2008 R2 core, must install 2012 core and then GUI B.

Not least effort C). Not least effort

D). Upgrade to 2012 and install GUI shell

<http://technet.microsoft.com/en-us/library/jj574204.aspx>

Upgrades that switch from a Server Core installation to the Server with a GUI mode of Windows Server 2012 R2 in one step (and vice versa) are not supported. However, after upgrade is complete, Windows Server 2012 R2 allows you to switch freely between Server Core and Server with a GUI modes. For more information about these installation options, how to convert between them, and how to use the new Minimal Server Interface and Features on Demand, see

<http://technet.microsoft.com/library/hh831786>.

Answer: C,D

NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two servers that run Windows Server 2016. You plan to create a Network Load Balancing (NLB) cluster that will contain both servers.

You need to configure the network cards on the servers for the planned NLB configuration.

Solution: You configure the network cards to be on a separate subnet and to have static IP addresses. You configure the cluster to use unicast.

Does this meet the goal?

- A.** Yes
- B.** No

Answer: B
