NEW QUESTION: 1

As a new CISO at a large healthcare company you are told that everyone has to badge in to get in the building. Below your office window you notice a door that is normally propped open during the day for groups of people to take breaks outside. Upon looking closer you see there is no badge reader. What should you do?

- A. Have a risk assessment performed.
- B. Close and chain the door shut and send a company-wide memo banning the practice.
- C. Post a guard at the door to maintain physical security
- D. Nothing, this falls outside your area of influence.

Answer: A

NEW QUESTION: 2

How will the BlackBerry MDS Connection Service failover in an environment configured for high availability? (Choose one)

- A. The BlackBerry Enterprise Server will establish connections with all BlackBerry MDS Connection Services: one designated as the active connection and the rest as standby Connections
- B. The BlackBerry Enterprise Server will establish connection with a single BlackBerry MDS Connection Services and designate it as the active connection

C. The BlackBerry Enterprise Server will establish active connections with all BlackBerry MDS Connections Services and will load balance requests across all BlackBerry MDS connection servers

D. The BlackBerry Enterprise Server will establish connections with two BlackBerry MDS Connection Services: one designated as the active connection and one designated as the standby connection

Answer: A

NEW QUESTION: 3

A company has just completed a vulnerability scan of its servers. A legacy application that monitors the HVAC system in the datacenter presents several challenges, as the application vendor is no longer in business.

Which of the following secure network architecture concepts would BEST protect the other company servers if the legacy server were to be exploited?

A. VLAN

B. Virtualization

C. Extranet

D. Air gap

Answer: D
