NEW QUESTION: 4

What is the main characteristic of a bastion host?

- A. It does packet filtering.
- B. It is a hardened computer implementation
- C. It is a firewall.
- D. It is located on the internal network.

Answer: B

Explanation:

Explanation/Reference:

A bastion host is a special purpose computer on a network specifically designed and configured to withstand attack. The computer hosts a single application, for example a proxy server, and all other services are removed or limited to reduce the threat to the computer. It is hardened in this manner primarily due to its location and purpose, which is either on the outside of the firewall or in the DMZ and usually involves access from untrusted networks or computers.
