As for the safety of payment, our Certified Application Specialist - Performance Analytics exam questions and answers

NEW QUESTION: 3

Which two options are BGP attributes that are updated when router sends an update to its eBGP peer? (Choose two.)

- A. AS_path
- B. local preference
- C. weight
- D. next-hop

Answer: A,D

Explanation:

AS_Path describes the inter-AS path taken to reach a destination. It gives a list of AS Numbers traversed when reaching to a destination. Every BGP speaker when advertising a route to a peer will include its own AS number in the NLRI. The subsequent BGP speakers who advertise this route will add their own AS number to the AS_Path, the subsequent AS numbers get prepended to the list. The end result is the AS_Path attribute is able to describe all the autonomous systems it has traversed, beginning with the most recent AS and ending with the originating AS. NEXT_HOP Attribute specifies the next hop IP address to reach the destination advertised in the NLRI. NEXT_HOP is a well-known mandatory attribute that is included in every eBGP update. Reference.

NEW QUESTION: 4

You are managing an Oracle Database 11 g instance with ASM storage. You lost an ASM disk group DATA. You have RMAN backup of data as well as ASM metadata backup.

You want to re-create the missing disk group by using the ASMCMD md_restore command. Which of these methods would you use to achieve this? (Choose all that apply.)

- A. Restore the disk group with the exact configuration as the backed-up disk group, using the same disk group name, same set of disks, and failure group configurations.
- B. Restore metadata in an existing disk group by passing the existing disk group name as an input parameter.
- C. Restore the disk group with the exact configuration as the backed-up disk group, using the same disk group name, same set of disks, failure group configurations, and data on the disk group.
- D. Restore the disk group with changed disk group specification, failure group specification, disk group name, and other disk attributes.

Answer: A,B,D
