NEW QUESTION: 1

The act of requiring two of the three factors to be used in the authentication process refers to?

- A. Double Authentication
- B. One-Factor Authentication
- C. Two-Factor Authentication
- D. Bi-Factor Authentication

Answer: C

Explanation:

Two-Factor Authentication is a security process that confirms user identities using two distinctive factors—something you know, such as a Personal Identification Number (PIN), and something you have, such as a smart card or token.

The overall strength of Two-Factor Authentication lies in the combination of both factors, something you know and something you have.

NEW QUESTION: 2

CORRECT TEXT

Answer:

Explanation:

A,B
