So, you can attend the C_S4CSC_2208 test without psychological burden, Our relationship with you doesn't begin and end with you monetary transaction with us about certification guide for C_S4CSC_2208 - Certified Application Associate - SAP S/4HANA Cloud (public) - Supply Chain Implementation exam.

NEW QUESTION: 1
An LDAP user cannot authenticate against a FortiGate device.
Examine the real time debug output shown in the exhibit when
the user attempted the authentication; thenanswer the question
below.

Based on the output in the exhibit, what can cause this
authentication problem?
A. The FortiGate has been configured with the wrong
authentication schema.
B. User student is not found in the LDAP server.
C. User student is using a wrong password.
D. The FortiGate has been configured with thewrong password for
the LDAP administrator.
Answer: B

NEW QUESTION: 2
A customer is implementing an IBM Storwize V7000 Unified
solution and will access both file and block
storage. Two fibre channel adapters are included within each
controller.
What is the maximum number of fibre channel connections the
customer can connect to its SAN fabrics?
A. 0
B. 1
C. 2
D. 3
Answer: C
Explanation:
With the introduction of the 2076-524 nodes, and the ability to
have up to eight FC ports per node, there
are several different options that are valid for attaching
storage to the Storwize V7000 Gen2 cluster.
Apply these Storwize V7000 Unified configuration details for
Fibre Channel and Fibre Channel Over
Ethernet (FC/FCoE Gateway, FCF) switches to ensure that you
have a valid configuration.
Configuring your SAN with at least two independent switches, or
networks of switches, ensures a
redundant fabric with no single point of failure. If one of the
two SAN fabrics fails, the configuration is in a
degraded mode, but is still valid . You should maintain
separate fabrics for FCoE and FC. If you attempt to
combine these fabrics, you might risk adding additional paths
to the volumes. Supported configurations
allow a maximum of eight paths.
