A company plans to create an information portal that managers can use to view critical information about their teams.

You need to recommend the type of Power BI components that the company should use.

What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE. Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Report

Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.

Box 2: Dashboard

Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report

Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.
