D. Synthetic transaction
E. TCP/IP ping
Answer: A,C,D
Explanation:
Explanation/Reference:
B, D: Setting up the availability definition for the service.
This can be service test-based or system-based. If
you select service test, the service's availability is based on
the execution of the service test by the one or
more key beacons. If availability is based on system,
availability is based on the status of one or more key
components of the system.
C: The synthetic transactions provide a direct means of
measuring the real end user experience for the
various business services. This way of modelling the business
services through the execution of synthetic
transition provides a consumer perspective of the service
availability and performance.
