**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

Secure Internal Communication (SIC)

Secure Internal Communication (SIC) lets Check Point platforms and products authenticate with each other. The SIC procedure creates a trusted status between gateways, management servers and other Check Point components. SIC is required to install policies on gateways and to send logs between gateways and management servers.

These security measures make sure of the safety of SIC:

Certificates for authentication

Standards-based SSL for the creation of the secure channel

3DES for encryption
