In addition, ITIL-4-Foundation exam materials are high quality, since we have experienced experts to compile and verify them, therefore the quality and accuracy can be guaranteed, so you can use them at ease.

Just click the choice version on the website page, and it will transfer into the payment one, So that our ITIL-4-Foundation study braindumps are always the latest for our loyal customers and we will auto send it to you as long as we update it.

Using our products does not take [Valid EAPF2101B Exam Bootcamp](#)

you too much time but you can get a very high rate of return.

NEW QUESTION: 1

You are preparing the storage volume for use in an instance. Which two tasks must you perform?

- A. Connect to the Database Deployment to which you attached the storage volume by using ssh or PuTTY as the oracle user.
- B. Connect to the Database Deployment to which you attached the storage volume by using ssh or PuTTY as the opc user.
- C. Create a mount point on your instance.
- D. Point to a mount point that has existing files and directories.

Answer: B,C

Explanation:

To add temporary storage to a database deployment:

Use the Create Storage Volume wizard in the Compute Cloud Service console to create a storage volume.

Attach the storage volume to the Compute Cloud Service instance on which the compute node is running. When you attach the storage volume, it is assigned a disk number. Note down this disk number for later use.

Connect as the opc user to the compute node.

Start a root-user command shell\$ sudo -s #

Confirm the addition of the storage volume by using the ls command:# ls /dev/xvd* Create a single, primary partition that occupies the entire storage volume by using the fdisk command. Create a file system on the partition by using the mkfs command.

Create a directory to use as the mount point for the partition by using the mkdir command.

Mount the partition on the directory you just created by using the mount command.

Set the ownership and permissions of the mount-point directory appropriately by using the chown and chmod commands.

Exit the root-user command shell.

NEW QUESTION: 2

Which configuration command allows a virtual router to receive updates from a configured NTP source?

- A. enable ntp-client
- B. setntp-client
- C. ntp enable
- D. enable ntp

Answer: C

NEW QUESTION: 3

A service provider NOC engineer received numerous support tickets from their VPN customers. These customers are reporting packet loss between two PE routers. The NOC engineer created a VRF TEMP to run tests between these two PE routers, and no errors were reported. ECMP links are used between P and PE routers.

Which test can quickly identify the core link that is causing the problems?

- A. avrf traceroute between customer's CE router and service provider's remote PE router
- B. anmpls ping with sweep option between the PE's loopbacks
- C. an extended traceroute with multipath option between the PE's loopbacks
- D. avrf ping between customer's CE router and service provider's remote PE router
- E. an extended ping with sweep option between the PE's loopbacks
- F. anmpls traceroute with multipath option between the PE's loopbacks

Answer: F
