CIPP-A study guide's good results are derived from the intensive research and efforts of our experts.

NEW QUESTION: 1

In the development of the Internet, there are many milestone events. The order of the milestone events in the following options is normal.

A. www is officially open to the public-the birth of DNS-the establishment of TCP / IP protocol specifications-the birth of ARPANET

B. The establishment of TCP / IP protocol specifications-ARPANET is born-www is officially open to the public-DNS is born

C. The birth of DNS-the establishment of TCP / IP protocol specifications-the birth of ARPANET-www is officially open to the public

D. The birth of ARPANET-the establishment of TCP / IP protocol specifications-the birth of DNS-www is officially open to the public

Answer: D

NEW QUESTION: 2

Byron wants to analyze the relationship between the size of the holiday advertising budget and sales. Which analytical strategy will he use?

A. simple linear regression

B. multiple linear regression

C. trend analysis

D. ratio

Answer: A

Explanation:

Explanation: Byron will use a simple linear regression. A simple linear regression is good for examining the relationship between two variables. In this case, Byron wants to look at the relationship between the advertising budget and sales. A trend analysis, on the other hand, focuses on a single variable. A ratio considers the relationship between two variables, but it is more aimed at establishing a traditional benchmark than in learning more about the relationship. Finally, a multiple linear regression analyzes the relationships among more than two variables.

NEW QUESTION: 3

HOTSPOT

You are administering an Azure environment for your company that requires multiple virtual machines (VMs) for a production

application. You have the following requirements:

*Two VMs are required for application data.

*Seven VMs are required for image processing.

*VM sizes should be set to Standard D2.

*Only two image processing servers can be rebooted at a time.

You need to configure an availability set for the image processing VMs.

You many fault domains and update domains should you implement?

To answer, configure the appropriate options in the dialog box in the answer area.

NOTE: Each correct selection is worth one point.
