NEW QUESTION: 1

Bob was frustrated with his competitor, Brownies Inc., and decided to launch an attack that would result in serious financial losses. He planned the attack carefully and carried out the attack at the appropriate moment.

Meanwhile, Trent, an administrator at Brownies Inc., realized that their main financial transaction server had been attacked.

As a result of the attack, the server crashed and Trent needed to reboot the system, as no one was able to access the resources of the company. This process involves human interaction to fix it.

What kind of Denial of Service attack was best illustrated in the scenario above?

- A. DoS attacks which involves flooding a network or system
- B. DoS attacks which is done accidentally or deliberately
- C. DoS attacks which involves crashing a network or system
- D. Simple DDoS attack

Answer: C
